Northern Tier Network Status Report
The University of Montana and Montana State University
February 18, 2010

SPEEDS AND FEEDS
Montana’s portion of the Northern Tier Network is lit and operational.
- UM and MSU each have 10Gb links operational, providing 10Gb internet service
- UM and MSU each have 10Gb links to Billings, tied together to form a 10Gb path between UM and MSU, and tied to a “legacy” 2.5Gb link to provide a shared backup/secondary path
- UM/MSU have a grant proposal pending (EPSCoR/CI) to build out links in Miles City and Billings
- UM/MSU have a number of 10Gb links held in reserve for future use/growth

COST SUMMARY
One Time Funding Set-Aside $2,000,000
Spring 2008 Estimate $1,754,266
Current Estimate $1,737,035
Total Absorbing FY09 On-Going Costs $1,861,755

Annual On-Going
- Spring 2008 Estimate $361,843
- FY09 – Current Estimate (absorbed in OTO) n/a
- FY10 – Current Estimate $248,108
- FY11 – Current Estimate $328,941
- FY12,... – Current Estimate $367,228

RELATIONSHIP BUILDING
- MUS-Others: Possible expansion of network connectivity via NTIA/Broadband funding
- MUS-State ITSD: Cooperation for use of Miles City Data Center
- MUS-MCC & DCC: Possible network aggregation (higher speed, lower cost) in Miles City
- UM-USFS: Link USFS R&E labs to national R&E networks
- UM-Indiana University-Global Research Network Operations Center: Mirror IU-GRNOC network data at a Montana site
- ...
