What percentage of students graduate?
47.3% of full-time students received their bachelor’s degree within 6 years. Graduation rate data are based on undergraduate students who enrolled full-time and have never enrolled in college before. This may not represent all undergraduates that attend this institution.

Are students able to repay their loans after they graduate?
4.7% of borrowers defaulted on their Federal student loans within three years of entering repayment.

What is the typical amount borrowed for a student’s undergraduate study?
Families typically borrow $32,455 in Federal loans for a student’s undergraduate study. The Federal loan payment over 10 years for this amount is approximately $177.86 per month. Your borrowing may be different.

What kinds of jobs do students have when they graduate?
The U.S. Department of Education is working to provide information about the average earnings of former undergraduate students at The University of Montana who borrowed Federal student loans. In the meantime, ask The University of Montana to tell you about how many of its graduates get jobs, what kinds of jobs they get, and how much those graduates typically earn.

Visit http://www.mywaytowork.org to explore what potential careers a particular postsecondary program or major prepares you to enter. The site has information about current earnings and potential growth in those occupations.

The College Scorecard has been designed by the U.S. Department of Education to provide better information to students and parents about college affordability and value. More information about the data included in the scorecard is available here. Note that the information included in the scorecard may not apply to all students. Students should contact the institution for more information about these measures.
