## MONTANA STATE UNIVERSITY | BOZEMAN

Sharon Neufeldt, associate professor in chemistry and biochemistry, and faculty member Brittany Terese Fasy in the Gianforte School of Computing each received a <u>Presidential Early Career Award</u>, the highest honor the United States government gives to outstanding scientists and engineers near the beginning of their careers.

Fourteen Montana communities have been selected to participate in <u>MSU Extension's Reimagining Rural</u> virtual community gathering series.

A new study led by a scientist in the MSU <u>College of Agriculture</u> provided the <u>first comprehensive</u> <u>global estimates of water stored in plants</u> and the time it takes for that water to flow through them. The research addresses a gap in understanding of the global water cycle.

To help address the state's need for special education teachers, MSU will soon begin offering a <u>special</u> <u>education teaching certificate</u>.

Paul Nugent was named the <u>Whitney and Elizabeth MacMillan Endowed Chair in Precision Agriculture</u>. His research concentrates on remote sensing, data processing, thermal imaging and optics, and he is currently researching how to integrate those technologies to optimize agricultural yields

<u>An experimental computer</u> developed at MSU successfully launched from Kennedy Space Center bound for the moon. <u>RadPC</u> is three times as stable as the current state-of-the-art space computers due to its ability to withstand potentially crippling radiation.

Two graduate students in MSU's <u>College of Agriculture</u> have published new research on two aspects of management <u>wheat stem sawflies</u>, one of the region's most damaging agricultural pests.

MSU will spend up to \$50.5 million for projects to <u>improve energy efficiency and address deferred maintenance</u> in campus buildings – beginning what will be one of the largest investments in sustainability in university history.

MSU's Renne Library <u>celebrates its 75th anniversary</u> this year, <u>marking three-quarters of a century</u> of helping Montana State students succeed.
