step?

MYTH VS REALITY

MYTH

College is so expensive only the rich can afford to go.

I have to have it all figured out right when I start.

I can make as much money without a degree.

If I go to college, I will graduate with a mountain of debt.

Trades careers have immediate job openings.

FACT

College financial aid is determined by financial need. The greater your financial need, the greater your opportunity to qualify for scholarships and grants.

Most colleges give you the first two years to decide what career pathway you want to take. It's important to dabble!

You may start making money earlier, but your wages increase with a degree and you will have more job stability and opportunities. Investing in a couple years of school could lead to higher wages.

There are multiple ways to make sure you graduate with a degree/certification with minimal debt. Take advantage of summer jobs, in-state tuition, and programs that offer credentials with shorter time-to-completion.

Trade careers are also in high demand, but most require postsecondary education. MUS resources can help you find quick, affordable career pathways that work for you.

Road trip >

There are many roads you can take,
depending on what's right for you.

OPTIONS AFTER HIGH SCHOOL

you've got options..

Sprint Degrees

Learn quicker and start earning money sooner with Montana University System Sprint Degrees.

Sprint Degrees are accelerated, high-quality college programs offering flexible schedules and summer coursework to condense bachelor's degrees to 2.5 years and associate degrees to 12–18 months.

Apprenticeship/Career Training

Earn while you learn with Montana Registered Apprenticeships through the Montana Department of Labor & Industry.

Offering flexible, on-the-job training with experienced professionals in high-demand, high-paying fields.

110

Occupations offering apprenticeships since 2000

660

Businesses involved in MT apprenticeship programs

47%

Of projected worker demand will be in apprenticeable occupations over the next decade

Transferring Colleges

Don't know what you want to study? Looking for more affordable education option? Consider starting off at a Montana University System 2-Year college to complete your general education requirements before transferring to a four-year school.

2 + 2 Honor Scholarships are annually awarded tuition waivers to students who graduate with an associate degree from a 2-year campus or community college within the Montana University System.

Flexible Learning Options

Online learning lets you take control of your learning on your own schedule. Take a peek at the online degrees offered by the Montana University System.

Want to make more money?

Having more education helps.

What is lost without further education

Upward mobility/ economic advancement

Self-growth and becoming a life-long learner

Reflection and critical thinking skills

Opportunities and choices

Social impact and progress in our communities

Security and stability

Jobs that do not require postsecondary education often offer lower pay and have high turnover rates as workers look for longer-term, more stable employment.

Median usual weekly earnings (\$)

Source: US Bureau of Labor Statistics, [Current Population Survey](#)

More education = more opportunities, more confidence, and more money in your pocket.

On average, 69% of graduates were working in Montana after graduation.

And out of those..

Recent Montana graduates working year-round made

\$42,000

one year after graduation, which is above the state median wage.

Nationally, there is a similar need for more healthcare workers and software developers.
Most of these careers require some sort of postsecondary education.

Top 10 Occupations Projected to Add the Most Jobs

	Employment change, projected 2023–33 (in thousands)	Percent change, projected 2023–33	Median annual wage, May 2024

What does your degree mean?

ARTS vs SCIENCES

Degree Level	Arts (A.A., B.A., M.A., Ph.D.) 	Sciences (A.S., B.S., M.S., Ph.D.) 
Focus	Creative, Humanities, Social Sciences	Analytical, Technical, Math/Science
Common Majors	English, History, Psychology	Biology, Engineering, Computer Science
Career Paths	Writing, Education, Law, Arts	Medicine, Tech, Research, Engineering

Where next?

Transferring Colleges

Have you thought about 2 years at community college, and then 2 years on a university campus?

2 years at a community college can cost about the same as just 1 year at a four-year university.

It's never been easier to take equivalent courses at different campuses across the Montana University System to transfer.

Many programs can be completed in as little as 2 to 3 semesters and are designed so you can balance them part-time or in the evenings along with a job.

MUS Transfer

The Montana University System has created a common-course system to make sure courses are labeled the same. This makes it easy to know which courses taken at one campus have the same on another.

2 + 2 Honor Scholarship

You could go to school to receive your Bachelor degree and have your tuition waived for 2 years!

AWARD MONTANA

Overall Tuition Cost Comparison

Attending your local community college allows you to keep costs down and to make the transition to a large campus a little easier.

College can sound like an expensive choice.

Scholarships, grants, and aid can make the cost of your education in Montana more manageable.

Grants

Grants are financial aid that doesn't have to be repaid.
After you fill out the FAFSA, you could qualify for up to
\$7,000!

Scholarships

Like grants, scholarships are money for college that you don't have to repay. These can be local, national, or even offered by your college.

Work-study

A federal work program where you earn money to help pay for college expenses.

Have you heard of **FAFSA**?

(Free Application for Federal Student Aid)

FAFSA is a **FREE** application you fill out that tells you how much financial aid you are eligible for. This aid will come in the form of Pell grants (doesn't need to be repaid), federal loans, and work study.

This is one of the best opportunities for getting help with costs!

Cost of Tuition In-State vs. Out-of-State

Montana University System offers a broad and diverse amount of programs throughout our state.

Choosing to go to school in-state versus out-of-state is financially the far cheaper option. Make sure to explore all campuses and tribal colleges for the program that fits best for you to save **BIG** money!

Tuition & Support Programs

Dawson Promise

Dawson Promise is a supportive program aimed at helping youth aging out of the foster care system, unaccompanied youth, or homeless youth to obtain a 2-year education without debt.

Students will have a mentor to assist in navigating financial aid, campus resources, on-campus employment, and housing.

MONTANA STATE UNIVERSITY

MT Treasure State First Generation Scholarship

MSU supports their first generation students by offering a \$1,500 scholarship per year. The award is given to MT residents who self-report they are the first person in their family to go to college.

Hilleman Scholars Program

The Hilleman Scholars Program supports high-achieving, Pell-eligible Montana students with scholarships, mentoring, and leadership development. Scholars join a Summer Success Academy, earn up to \$19,000 in support, and commit to community engagement and academic excellence.

Carroll College will cover the remaining tuition for first-time, resident freshmen enrolled in an undergraduate program who are federal Pell grant recipients.

The Grizzly Promise funds up to four years, or eight semesters, of UM tuition and fees.

If you're from a family with an income of \$50,000 or less, UM is dedicated to making sure your tuition is covered so you can attend University of Montana tuition-free.

Dual Enrollment + One-Two-Free

Save your time, money, and help while transitioning to college

Dual Enrollment provides high school students the opportunity to take college courses while still in high school.

Dual Enrollment allows students to take 100 and 200 level college courses.

To enroll in the One-Two-Free Dual Enrollment program, ask your school counselor for approval and the proper course registration form.

88.9% of Montana public high schools offer dual enrollment courses.

On average, about 60% of dual enrollment students attend a college in the Montana University System.

Upon graduation, Dual Enrollment (DE) students average \$570 less in student loans per credit than non-dual enrollment graduates.
That's over \$1700 in savings!
